

Day 7

Assignment 1: Ensure the script checks if a specific file (e.g., myfile.txt) exists in the current directory. If it exists, print "File exists", otherwise print "File not found".

A)

```
$ file="gayi.txt"

if[ -e "$file" ], then

echo "file exist"

else

echo "File not found"

fi
```

output:- File exist

Steps to run the script:

1. Create a Shell Script File: Open a terminal and create a new file, e.g., check_file.sh

-->nano check_file.sh

2. Paste the Script: Copy the above script and paste it into the check_file.sh file.

3. Save and Exit: Save the file and exit the text editor (for nano, press Ctrl+X, then Y, then Enter).

4. Make the Script Executable: Give execute permission to the script

-->chmod +x check_file.sh

5. Run the Script: Execute the script

-->./check_file.sh
